
Why does the baby cry??

Posted by julia - 2008/01/23 01:54

Many times i find my baby cries but i don't know why?
If anyone can help me i'll be grateful

baby may cry for many reasons like,she may be hungry or has colics but after time you'll gain the experience and easily know why she cries..

Baby may feel wet so u have to change her diaper also baby may need to be held to stop crying ...
Maybe something annoyed him,noise,light,...

Baby cries for one of the following reasons:
i need food,
i need to be comfortable(for ex.tight clothes),
i need to be warm (not too hot not too cold),
i need a rest,
i need to be held,
i'm ill,
i'm wet
