
What about analgesics in 1st trimester?

Posted by Laila - 2008/01/27 23:32

If i feel any kind of pain in the first trimester,what are the permitted analgesics??

Acetaminophen or paracetamol (Tylenol and other brands) is the safest medication for relieving pain and fever during pregnancy

This is the only potentially safe analgesic to be taken during entire pregnancy as it acts centrally rather than peripherally.
